Customer oriented. Effective. Promptly.

Gamal Kira

Eberhard Michaelis

Michael Kloss

GEM —

We ...

Since the foundation in 1999, GEM Team Solutions has established a name as a [consultant in the IT-field](#) and [software developer](#).

Due to many years of experience in the development of CAD-application, shareholders and members of staff possess [profound know-how in the CAD-field](#).

Through active engagement in diverse committees GEM Team Solutions has brought forward the definition of product data models in [data exchange](#).

The CAD-field is still one of our core competences but we can do more.

We are familiar with [all popular operating system platforms](#). [On site coaching](#) by one of our development teams is part of our portfolio as well as custom [software development](#).

Our customers have versatile demands. We have custom-fit solutions.

GEM Team Solutions  
Customer oriented. Effective. Promptly.

... offer ...

- many years of [experience](#) in object oriented software-development, national and international.
- [quality](#) work is our priority.
- [result oriented approach](#).
- [sufficient resources](#) for prompt and flexible responses to our customers requests.
- [differentiated know-how](#) in CAD and computer graphics.
- data- and object-modeling, -converting, -transfer, smooth informationflow.  
[We speak your language](#). We understand your problem.

... new software solutions ...

### ... for software-users

A supplement to your basic software of special functions permits significant time savings in the daily work which means considerable cost savings.

### ... for software producers

We support a line of wellknown software producers with our specific know-how. For example, GEM Team Solutions develops import-/export interfaces for all kind of data formats as well as database connections on a variety of applications for a multitude of customers.

### ... for a multitude of industries

For instance these also may include applications for complete process monitoring or quality management in general. Be it client-/serverbased, in the intranet or internet: our solutions are ideally adapted to the need of our customer.

... for customers worldwide.

Satisfied customers are our goal.

Therefore we give our customers the opportunity to report their experiences on our website.

You may find further information on realized projects and our detailed portfolio online as well.

Satisfied customers are our best reference. Assure yourself of the quality of our offer.
